# BENCHMARK ESG™

The Next Generation of Gensuite®

Streamline Waste Management & Compliance from Generation to Disposal with

Waste Tracker!

Effective waste management programs are critical to the success of an organization's environmental compliance and sustainability program efforts. By using the robust automation processes and workflows of Benchmark's Waste Tracker, users significantly reduce the time spent tracking and managing waste while controlling waste-related costs and environmental compliance throughout the organization.

Benchmark Waste Tracker is a centralized solution for storing critical waste profile/stream documentation, tracking and managing hazardous and non-hazardous waste from point of generation through shipment to disposal facilities. With a comprehensive mobile interface, employees can scan QR codes to easily manage & comply with all labeling, packaging, storage, and disposal regulatory requirements.

DISCOVER WHAT WASTE TRACKER CAN DO FOR YOU

Integrated tracking, administration, and reporting to manage hazardous & non-hazardous waste streams

▶ Easily control all aspects of waste management and reduction efforts through mobile devices with barcode and QR code-enabled labels

▶ Centralized documentation of site-specific waste profiles and shipment details to provide quick access for regulators, auditors and emergency responders

▶ Decrease and control costs related to waste generation and transportation

▶ Reduce environmental risk by leveraging business approved waste vendors by site location or organization-wide

▶ Ensure regulatory compliance of global hazardous waste requirements, including labeling, packaging, storage and disposal

▶ Establish waste management KPIs and reporting frequencies to meet goals related to container age dates, permit status, and exception dates

▶ Easily monitor and manage container shelf-life, usability and quality

BENCHMARK ESG ™ WASTE TRAKCER

2021 Top Product of the Year Award
Environment + Energy Leader

Environment + Energy LEADER TOP PRODUCT 2021

Waste Tracking By The Numbers

▶ 60+ global business utilizing Waste Tracker

▶ 2,769+ global sites tracking waste

▶ 457,680+ manifests/shipments added & tracked

KEY CAPABILITIES

▶ Record and manage waste requirements, including classification & labeling, contents, on-site storage, transport and disposal manifesting for both hazardous & non-hazardous waste

▶ Manage waste collection points, containers, and storage areas

▶ Establish standardized waste profiles at the site and enterprise level

▶ Analyze and review trends of waste volumes, costs, and more at the site and enterprise levels

▶ Benchmark ESG annual waste reports to meet regulatory requirements and internal reporting needs

▶ Mobile Enabled, available on tablet & smartphone devices (Apple, Android + Windows)

▶ Integrations with Benchmark ESG applications, such as Safety Data Sheets (SDS), Power Inspection Tool, and Sustainability Reporting

▶ Extensions for managing waste vendor qualification programs aimed at surveying waste vendors, conducting on-site inspections, and more

THE POWER OF BENCHMARK TECH™

Benchmark ESG | Gensuite Mobile

Quickly access and manage containers and initiate manifests/shipments, and conduct waste inspections through the power of Mobile

• Barcode & QR code labels & scanning

• Smartphone & Tablet-enabled (Apple, Android & Amazon)

• Mobile-friendly online forms

BLE Beacons IoT Devices

Accelerate task completion by receiving automatic notifications on a mobile device when in the proximity of a Beacon

• Waste container information

• Waste area details, i.e. generators, collection points, storage areas

• Waste inspection task details
