

Streamline Air Emissions Compliance with Benchmark AirLog!

Air permit compliance and emissions management is a critical dimension of ESG-centric environmental compliance and sustainability commitments across manufacturing and service industries.

Streamline and simplify your air emissions management program with Benchmark AirLog - a single digitized solution to record, monitor, track, and report on air sources & parameters to enable compliance with site specific and operational air permit requirements. Leverage powerful analytics & Mobile capabilities to establish and maintain a comprehensive air emissions management program, while engaging individual site and organizational-wide teams.

Achieve Air Emissions Compliance & Environmental Sustainability Management Goals

Discover What Benchmark AirLog Can Do For You!

Regulatory & Permit Requirements

Emission Source Management

Emissions Data Collection & Calculations

Exceedance Warnings & Alerts

Reporting & Analytics

Tanks & Air Source Reporting extension available to track throughput of tanks, manage detailed calculations, and report emissions

Emission Monitoring Data Entry

1. Mobile App with QR Code

Access AirLog from anywhere & utilize QR codes to easily log data on the go

3. Data Feed Integration

Automatically send data from your legacy systems to AirLog

2. Excel Batch Upload Template

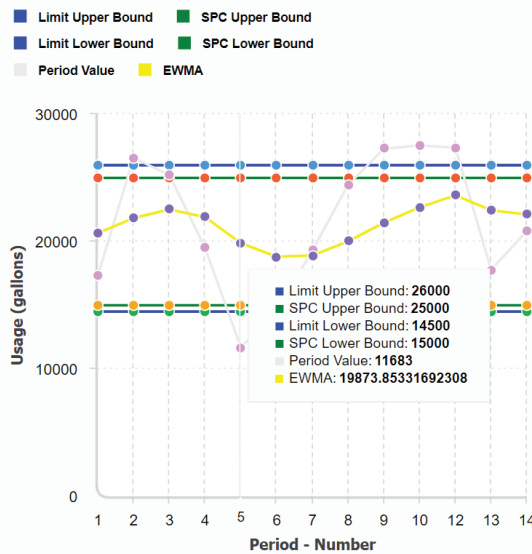

Upload large data sets at once to minimize data entry

4. Online Data-Entry Interface

Log on to Benchmark desktop to log data in our easy-to-use interface

Exceedance Alerting and Compliance Reporting

Send automatic alerts and notifications to site teams on air emission exceedances based on customized permit limit or operating threshold settings. To support site review and reporting obligations, multiple dynamic data reporting, visualization, and extraction options are available online. A few examples include,

- Generic Emission Report
- CEMS Semi-Annual Report
- 12-month Rolling Report
- Tank Emission Report
- HAP Emission Report
- Emission SPC Chart

Digitize & Simplify Air Compliance with Benchmark AirLog

- 1,100+ Global Sites Monitoring Data
- 9 Million Parameters Logged

Emerging Technologies for Environmental Management

Sensor & IoT Integration for advanced and integrated data collection

AI-Based Analytics for data visualizations & insights and potential predictive analysis

Remote Collaboration embedded for instant video & chat collaboration

All-in-One Mobile app for on-the-go workflows & forms
